Re: MUR 6696

Dear Mr. Jordan,

Crossroads GPS is in receipt of your correspondence dated April 26, 2013, regarding CREW's amended complaint in the above-referenced matter.

We note that CREW's amended complaint contains a number of minor revisions that are not highlighted in any way and which required a line-by-line comparison to discern.

CREW's amended complaint features a different "citizen" complainant with ties to Ohio. In the original complaint, Jessica Markley served in this role. For reasons that are not explained, she has been replaced by Nicholas Mezlak in the amended complaint. In our first response, we noted that "several claims made in the Complaint – including claims regarding the state of mind of unknown persons – are so obviously fabricated that it is almost certain that Ms. Sloan and Ms. Markley falsely swore to the Verifications submitted with their Complaint. . . . We also request that Ms. Sloane and Ms. Markley be referred to the appropriate authorities for investigation into whether either or both violated 18 U.S.C. § 1001 when they executed their respective Verifications and submitted this Complaint." Response (Jan. 17, 2013) at 2.

The same is now true of Mr. Mezlak, and we request that he also be referred to the appropriate authorities for investigation into whether he violated 18 U.S.C. § 1001 when he executed the Verification included in the amended complaint. In addition, we reiterate our request that the appropriate authorities investigate Ms. Markley and her claims, and especially

the facts and circumstances surrounding Ms. Markley's withdrawal from the original complaint, and who (at CREW or elsewhere, including Ms. Sloane), proposed, approved or executed the removal of Ms. Markley and substitution of Mr. Mezlak.

The other revisions found in the amended complaint refer to public filings already in the Commission's possession, all of which speak for themselves. The amended complaint contains no new substantive allegations, and Crossroads GPS has no further response at this time.

Sincerely,

Thomas J. Josefiak

Michael Bayes
